Who We Are
and What We Do

Unsure on how to dispose of your IT hardware?
Meet your security needs and sustainability goals whilst
maximising your IT budget with Techbuyer. We provide a
range of solutions to remove your redundant IT hardware
with the aim of maximising value, guaranteeing security
and minimising environmental impact.

Techbuyer is the leading company for refurbished enterprise
equipment in the UK and is renowned throughout Europe
for our commitment to creating long standing, trusting
relationships with clients, and extending the lifecycle
of the IT products we receive.

From singular components to full data centres, we can
arrange the best buyback solution for every business.
Explore each service in more detail to find out exactly
which offering meets your demands.

Contact our team today for a general enquiry and to
receive a quote for your equipment within 24 hours.

IT solutions for a sustainable future

Techbuyer's Guarantee

✓ **Value Maximisation**
We aim to ensure that you get the best possible value for your equipment to help maximise your overall IT budget.

✓ **Secure Data Sanitisation**
Each service we offer for IT disposal ensures that your data is securely destroyed to avoid data breaches. For higher risk companies needing stricter security practices, we advise our premium, accredited ITAD service is used.

✓ **Zero-to-Landfill**
No technology we receive will end up in landfill. Instead, we look to refurbish and reuse where possible, and we will ethically recycle when needed.

✓ **Reuse Where Possible**
With all equipment we receive, we look to refurbish and reuse devices and components to help extend the lifespan of technology. This could be through resale of equipment as refurbished products, component harvesting, or sending for charitable donation.

Our Buyback Services

# Techbuyer can meet the needs and priorities of your business in different ways.

1 **Sell to Us**
Receive value for your redundant IT hardware with a quick and hassle-free quote on your equipment.

2 **IT Asset Disposition (ITAD)**
Explore high level security for your IT removal that combines data protection, asset management and sustainability.

3 **Resource Recovery | E-waste Recycling**
Remove redundant equipment of all kinds and divert your e-waste from landfill for a more sustainable option.

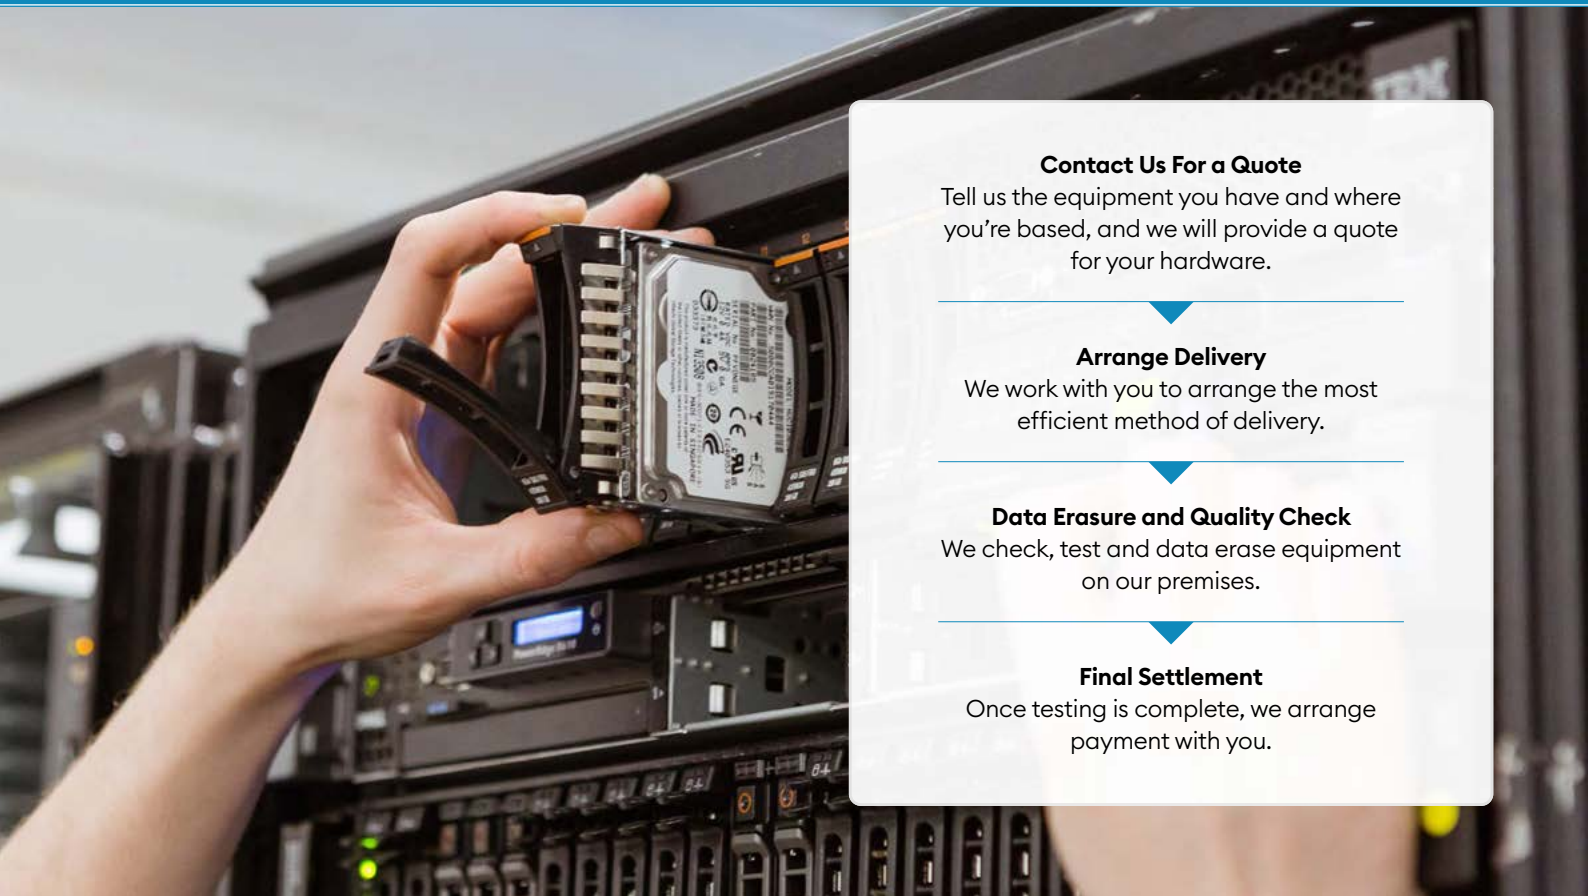

4 **Data Centre Decommissioning**
Streamline the entire decommissioning process – from auditing and IT removal to migration and installation.

IT solutions for a sustainable future

Sell to Us

Money caught up in redundant IT hardware? Invest in the future of your IT infrastructure or business development by selling your surplus IT hardware. We offer best in market prices for your data centre and enterprise hardware, including servers, networking equipment and CPUs, storage drives and server memory.

Contact Us For a Quote
Tell us the equipment you have and where you're based, and we will provide a quote for your hardware.

▼

Arrange Delivery
We work with you to arrange the most efficient method of delivery.

▼

Data Erasure and Quality Check
We check, test and data erase equipment on our premises.

▼

Final Settlement
Once testing is complete, we arrange payment with you.

Why Sell to Us?

→ **Sell Direct**
We're one of Europe's largest stockists of used enterprise equipment.

→ **Competitive Pricing**
We offer the best prices in exchange for your used IT equipment.

→ **Quick Response Times**
Get a quote for your unwanted IT equipment within just 24 hours.

→ **Data Erasure Guaranteed**
All equipment is data sanitised to the highest industry standards.

→ **Peace of Mind**
We've been dealing in used IT hardware since 2005.

→ **Environmentally Friendly**
Make money on your unwanted IT parts and protect the environment.

This isn't all we can do...
If you would prefer a redeemable trade-in value exchange for your goods, our team can provide options as well as quote on what you would be likely to receive. Contact our team for more information.

Resource Recovery | E-waste Recycling

Our team will always look to refurbish and resell hardware to extend a product's lifecycle, however we also provide sustainability focused e-waste recycling to reduce the impact of e-waste on the environment.

With a zero-to-landfill guarantee on all devices and components we receive, we'll ensure that your IT hardware is handled as sustainably as possible at end-of-life.

RESOURCE RECOVERY

Why choose Resource Recovery...

✓ All redundant hardware collected and removed
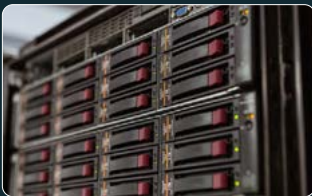

✓ Zero-to-landfill guarantee

✓ Effective e-waste management

✓ Product lifespan extension where possible

What Can Resource Recovery Recycle?

From single devices to entire data centres, we work with you to reduce the impact of e-waste on the environment.

Servers

Networking Equipment

Laptops and Desktops

Mobile Phones and Tablets

HDDs and SSDs

Server Components

Cables and Peripherals

PC Components and Spares

" **The resource recovery process encourages our team to maximise the value of every single piece of equipment that comes across their bench beyond its value as an asset to be recycled** "

Paul Thorogood, Resource Recovery Manager

Decommisioning Services

Take the headache out of decommissioning your data centre by working with our experienced team. We have a flexible approach and always provide personalised IT advice that meets your specific requirements. In other words, tell us what you need, and we'll handle the rest.

Through auditing, IT removal, migration and installation, our Data Centre Decommissioning Services provide expertise, experience and efficiency.

Why choose our Decommisioning Service...

✓ An all encompassing solution

✓ On-site services

✓ Heightened security and data protection

Our Data Centre Services Take Care of Every Step →

Logistics Planning
We'll discuss your data centre in detail and arrange specialist measures where necessary.

▼

Planned Downtime
We'll organise effective downtimewhen required with as little disruption as possible.

▼

Professional Removals
All equipment will be removed by our experienced team to protect any valuable hardware.

▼

Guaranteed Data Protection
All data bearing devices will be data sanitised or physically destroyed to protect your sensitive business information.

IT solutions for a sustainable future

Specialised IT Support and Service
With personalised advice from our IT specialists, from auditing right through to replacing hardware.

Industry Leading Data Erasure
Ensure 100% data sanitisation to protect sensitive business information.

Secure Chain of Custody
Protect your business with a full asset register and chain of custody.

The Sustainable Option
With over 99% of used IT hardware refurbished and resold, and the remainder ethically recycled.

IT Asset Disposition (ITAD)

ITAD is the process of decommissioning used or surplus IT hardware in a secure, cost-effective and environmentally conscious manner. Our ITAD service is designed to help customers who experience a high level of risk to dispose of their IT hardware securely.
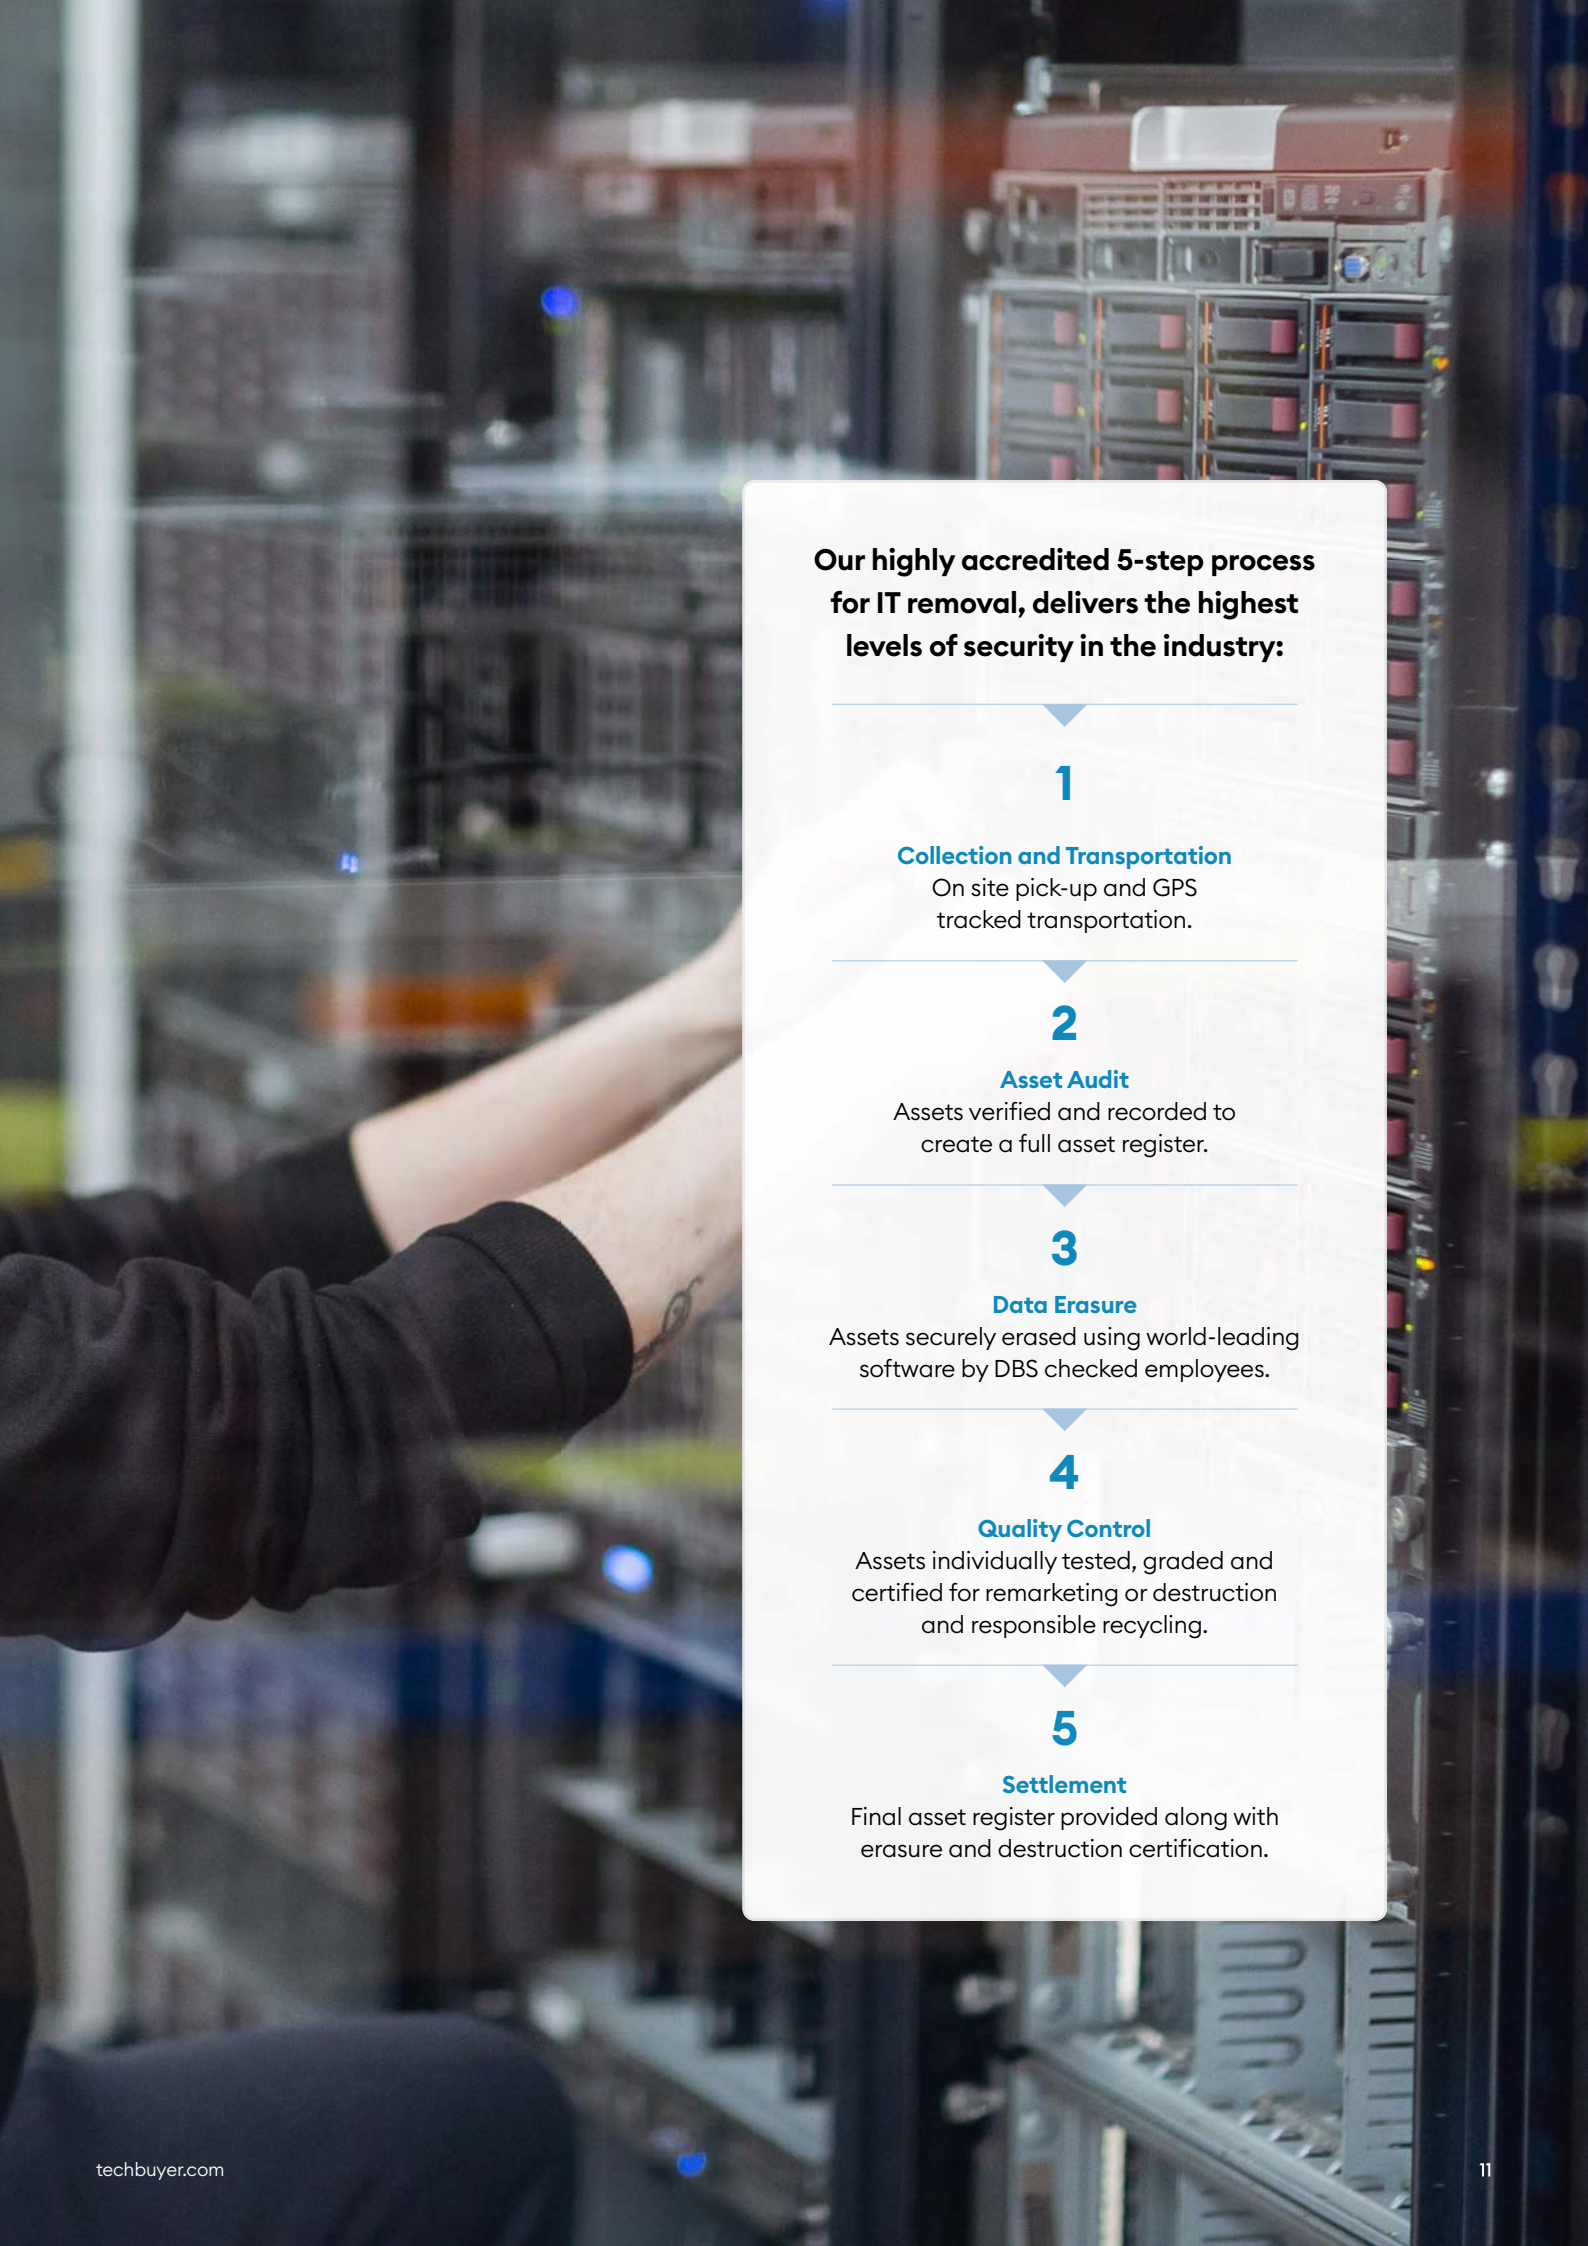

Why choose our ITAD service...

→ Extra levels of service available

→ Full asset register

→ Secure chain of custody

Our Accreditations

We operate in line with the most stringent ITAD accreditations that mitigate risk, guarantee secure data erasure with full certification and keep our clients compliant with data protection and environmental regulations.

We are certified as a provider capable of meeting the data security requirements of even the most risk adverse clients whilst ensuring that your equipment is handled in line with environmental best practice.

ISO 9001

ISO 14001

ISO 27001

ISO 45001

Our highly accredited 5-step process for IT removal, delivers the highest levels of security in the industry:

1

Collection and Transportation
On site pick-up and GPS tracked transportation.

2

Asset Audit
Assets verified and recorded to create a full asset register.

3

Data Erasure
Assets securely erased using world-leading software by DBS checked employees.

4

Quality Control
Assets individually tested, graded and certified for remarketing or destruction and responsible recycling.

5

Settlement
Final asset register provided along with erasure and destruction certification.

On-site Solutions

In some cases, we understand that data cannot leave your premises – this is why we offer on-site data destruction services for the highest-level of security.

Using Blancco and Erase IT, we erase 100% of your data, operating system and programs – where required, we can provide full certification to support the data erasure of each device.

Why choose our On-site Services...

✓ No data leaves your facility

✓ The highest level of data protection

✓ Collection of assets from your facility

ERASEIT

What Happens to Your Technology with Techbuyer?

We provide a zero-to-landfill policy on all technology we receive, as well as full transparency on where your technology will end up.

← Techbuyer's Refurbished Hardware

Our focus is to refurbish hardware to extend its lifespan and offer you the best value for used technology. All equipment we purchase, that can be reused, enters our refurbishment process to ensure quality for all future users.

Charitable Donations →

We work with our charity partners to deliver high-quality technology to those without, including those within our local community, as well as schools in Africa and children in areas affected by war.

← Component Harvesting

If a device itself has reached its end of life, this does not mean that all components within are not still of use. Our team can work to harvest a device of its components, keeping these parts in use for longer, whilst sending the device for resource recovery and recycling. This means that we can keep as much technology as possible in use and divert hardware from landfill.

E-waste Recycling Services →

For all technology that cannot enter our refurbishment process, we provide ethical e-waste recycling to protect the environment from the effects of redundant hardware. We work with recycling partners to retrieve as much as possible from e-waste – these materials then re-enter the manufacturing process to create new products.

Our Accreditations

Organisations have trusted us with the buying and selling of data centre equipment since 2005. Our government-backed accreditations, qualifications, and partnerships support the principles we've been working towards since the beginning: quality, security and environmental management.

→ **ISO 9001**
The ISO 9001 certification demonstrates our ambition to operate all areas of the business in the most efficient way possible, with the ultimate goal of ensuring complete satisfaction for our customers.

→ **ISO 14001**
The ISO 14001 accreditation establishes Techbuyer as a credible and ethical supplier, operating to a very high degree environmentally.

→ **ISO27001**
The ISO 27001 standard provides a framework for information security management best practice that helps Techbuyer protect client and employee information at all stages in the business life cycle.

→ **ISO 45001**
The ISO 45001 accreditation demonstrates excellent occupational health and safety. Staff wellbeing and safety is our number one priority, as well as promoting and protecting employee's physical and mental health.
