

Techbuyer

IT Solutions for a Sustainable Future

techbuyer.com

Struggling with outdated systems? Our industry-leading refurbished and new IT solutions ensure you get the latest high-performance technology without compromising on sustainability.

Confused about the best IT choices?

We guide you through every stage with our life cycle services, from IT analysis to secure asset recovery.

Concerned about environmental impact?

Our sustainable hardware and software solutions help you stay green while staying ahead.

Need a system tailored to your needs?

We support, maintain, and create bespoke IT systems built around your priorities.

From IT infrastructure design and new hardware solutions, high-quality refurbished devices and components, and IT maintenance offerings to responsible buyback options, our services encompass the entire life cycle of hardware.

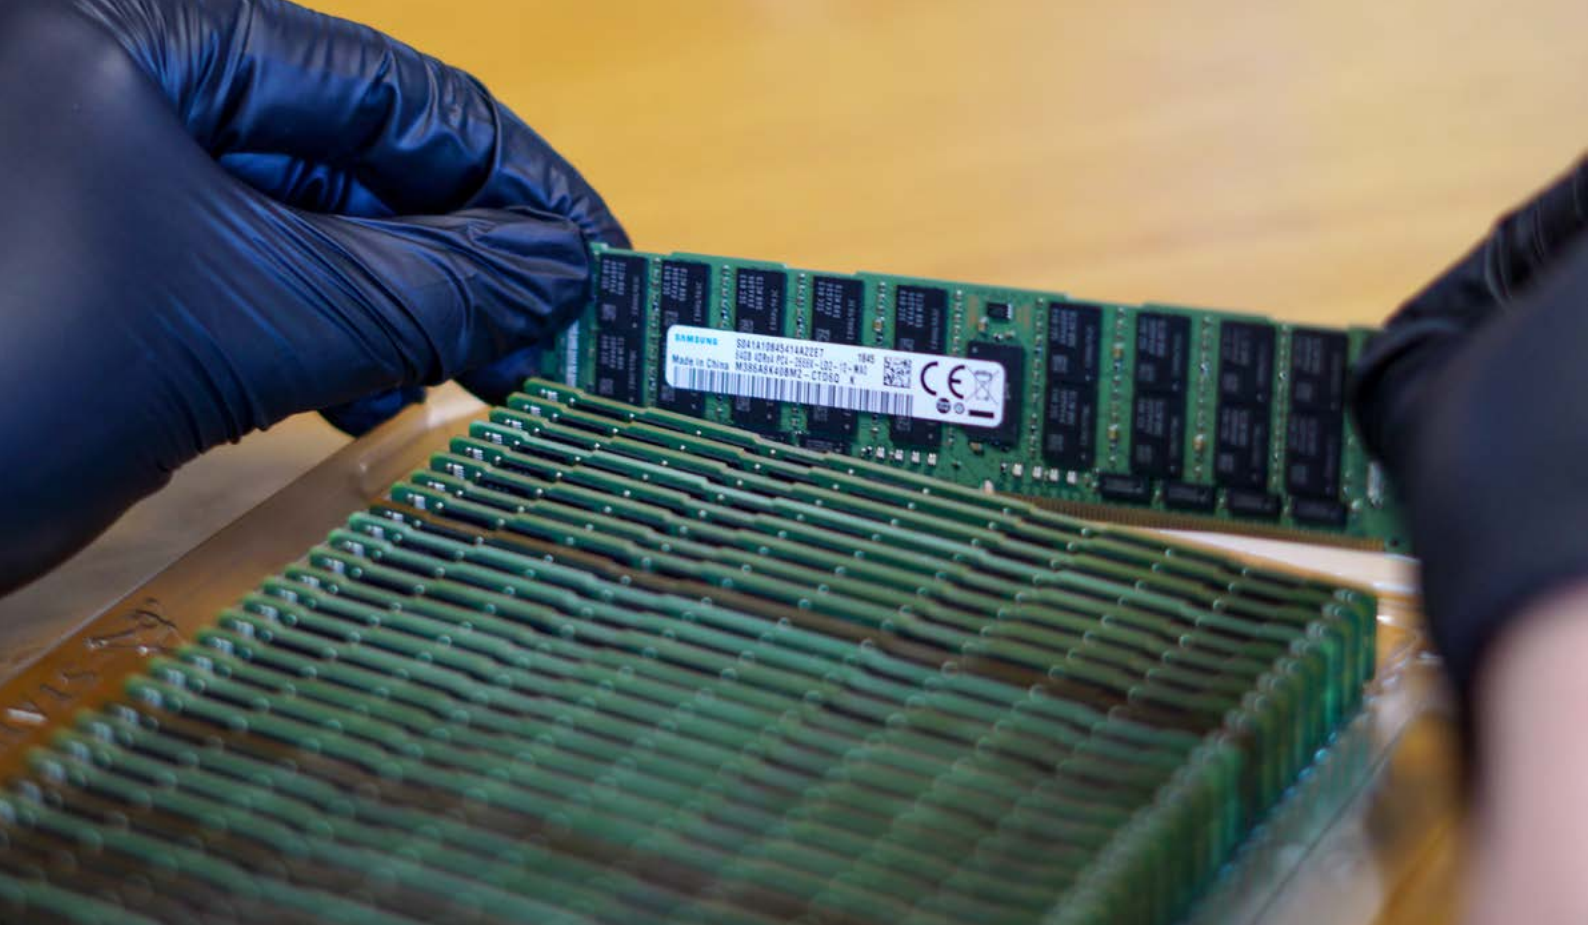

Supported by our carbon savings calculator and IT performance analysis tools, we can help you design and implement high-performance, highly-efficient solutions, report on your environmental impact, and utilise your technology to its full value.

Techbuyer offers a range of global services for every stage of the IT product life cycle:

- Analysis
- Consultancy
- IT Hardware Design
- High Quality Hardware Solutions
- Industry Leading Software
- IT Asset Recovery Services

Why Work with Techbuyer

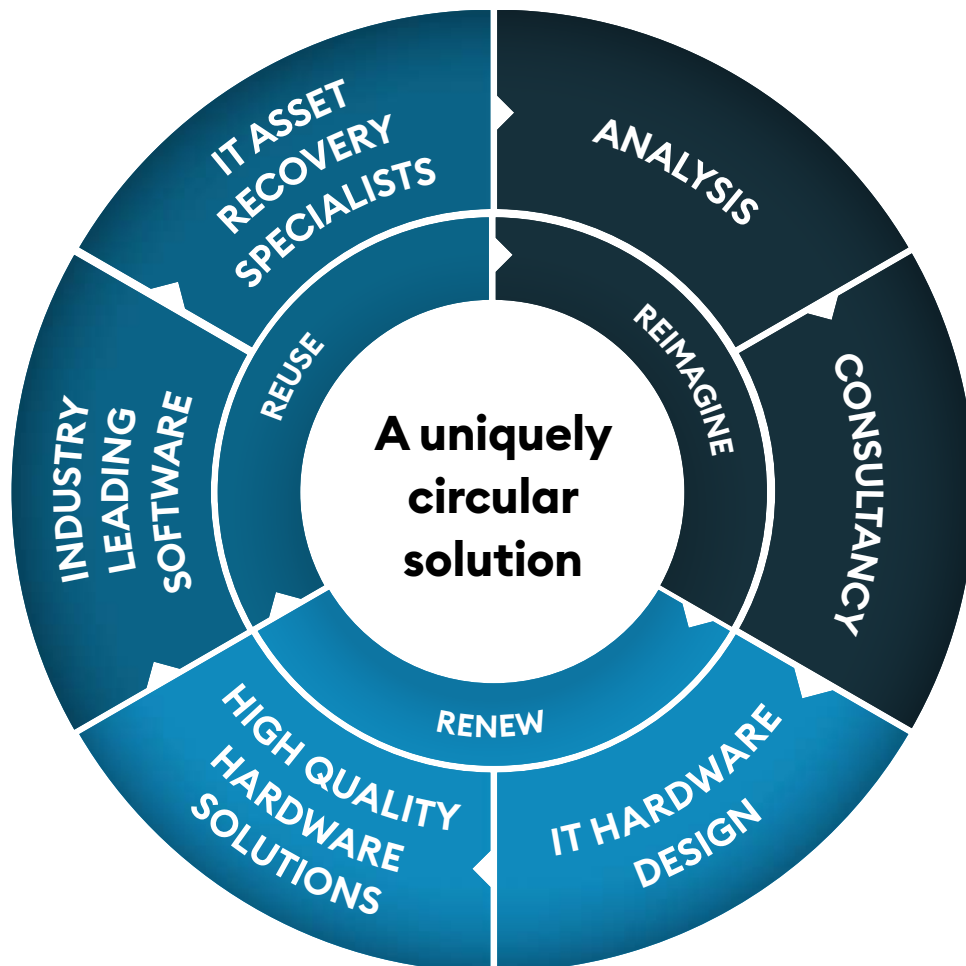

Whether you're looking for sustainable hardware and software solutions, industry-leading server efficiency tools, consultancy, or secure IT asset disposition, Techbuyer offers high-performance IT systems that are tailored to your business needs and include options for new, renewed or hybrid options.

Our collaborative, consultancy-led approach and the depth of our industry experience means we can tailor a solution specifically to your needs whatever your requirements.

We provide:

- **A uniquely circular approach:** At Techbuyer we provide, deploy, and support high-quality and powerful IT systems. With experienced and accredited engineers, coupled with our consultancy-led approach, Techbuyer can provide a uniquely circular solution for every stage of your project.
- **Optimised IT infrastructure:** Our Enterprise Solution Architects will design a bespoke IT system built for maximum efficiency and performance whilst delivering sustainable best practice.
- **Access to a huge global inventory:** We stock a global inventory of over 225,000 IT systems and parts from over 150 brands including HPE, Dell, IBM and Cisco.
- **Partnering with you to achieve your IT development goals with enterprise software:** Our technical experts will help you to deliver business outcomes and manage workloads with scalable infrastructure solutions from market-leading IT providers.
- **Supplying bespoke hardware to fit your needs:** Our new and high-quality refurbished IT parts and devices offer a sustainable alternative to improve the impact of your technology on the planet.
- **Secure and sustainable IT asset recovery:** Techbuyer's IT Asset Disposition (ITAD) service is the most secure and sustainable way to decommission, data sanitise and recover value from your IT hardware. We are trusted as the first choice for thousands of organisations in the public and private sector.

Sustainable High-performance IT Solutions Start with Life Cycle Thinking

REIMAGINE

RENEW

REUSE

Verifiable analysis of server efficiency and performance and expert recommendations based on your IT needs.

New and refurbished IT equipment paired with industry-leading software for a complete IT solution.

Secure and environmentally responsible disposal of IT hardware that guarantees 100% data erasure.

Enterprise Solutions

Market-Leading Enterprise IT Solutions

We pride ourselves on providing best-in-industry IT services and solutions for all our customers. Whether your infrastructure relies on new IT hardware, or refurbished devices, we offer enterprise solutions from leading vendors across both markets.

As the only true supplier of the full IT life cycle: designing, deploying, and supporting, from edge to cloud, we can combine the provision of new IT infrastructure with outstanding technical expertise, and an unprecedented commitment to sustainability. Our ability to supply both new, hybrid and fully refurbished systems, and our partnerships with the world's leading vendors, places Techbuyer in a unique position in the industry.

We have been offering IT solutions to businesses across all sectors for decades, with the aim of providing the very best solution for every organisation at every budget.

Our services are centred around four core areas of IT development to create bespoke and comprehensive solutions aimed at advancing your business operations:

- **Infrastructure Design and Implementation:** Create a custom IT architecture centred on your business needs. With a consultancy-led approach our technical experts are with you every step of the way.
- **Custom Backup Services:** Enhance the reliability of your organisation's backup solutions with tailored services and an analysis-led strategy.
- **Virtualisation Technology:** Generate a virtualised infrastructure architected and implemented to support scalability for your organisation and advance IT capabilities.
- **Cloud Technology Solutions:** Expand your computing capabilities and augment business reach by exploring cloud technologies. Our team work with you to deliver the best solution for your business.

What Sets Us Apart?

A Unique Offering and Exceptional Standards

We offer new IT solutions, fully refurbished systems, or a combination of the two. We are a global company with a local approach. We are knowledgeable, proactive, and passionate about delivering the right solutions for your business. Our customer-first approach means we take the time to understand your business to tailor solutions to meet your individual business needs.

Every solution, from a singular component to a full IT system, is housed, managed and processed in house. Our Harrogate-based facility is home to over 250,000 parts – this means that we have an extensive stock to help create a system that meets your requirements without compromise.

Market-Leading Vendor Relationships and Management

We have built strong relationships with market-leading vendors to offer edge-to-cloud solutions. As well as providing a wide range of products and support, we're able to take away the hassle of managing vendors, allowing you to focus on your core business.

Exceptional Technical Expertise and Support

Our highly experienced in-house, vendor-certified technical consultants are available at every stage of your project. Our approach ensures you have consistent contacts from project conception to completion.

Sustainable Best Practice

Sustainability is at the core of everything we do. Our enterprise solutions offer hybrid systems, combining new and refurbished technology, maintenance packages to keep your IT equipment in use for longer, and responsible disposal as and when necessary. At Techbuyer we deliver high-performance IT solutions that don't compromise sustainability best practice.

Vendor Accreditations

Techbuyer holds accreditations with the world's foremost Information Technology vendors:

Our Partners

Working in partnership with market-leading vendors we have the skills and expertise to develop first-class IT solutions encompassing consultancy, design, implementation, project management and support services.

Techbuyer and VMware's partnership is founded on a shared commitment to provide products and services to enhance performance, reduce complexity, and ultimately drive success.

Together we increase your productivity and agility by delivering professional, precise technology solutions.

VMware Design Services

Techbuyer's team of expert Technical Solutions Architects can assist with all aspects of VMware design:

Upgrades

The most important part of a successful upgrade is the planning. This needs to be designed in such a way to minimise downtime and the potential for data loss. A validation of the design against VMware best practices, as well as the VMware hardware compatibility guides, will ensure that the upgrade is done correctly with minimal disruption.

Hardware and Refresh

As with virtualisation upgrades, such as vSphere, a hardware refresh is heavily reliant upon correct planning to minimise downtime and disruption. It is also important to make sure that the target hardware is supported and that the migration is planned to minimise disruption.

Scaling Out

There are different licensing models and editions of VMware's services, including vSphere. We work with you to ensure that the right licenses are being used, preventing your business from the threat of over-licensing.

Our highly experienced VMware certified technical consultants guide you through presales, implementation, and post-sales support.

Access leading technology and all-encompassing solutions through Techbuyer's HPE Partnership, designed to bring you powerful IT solutions whilst maximising your overall budget.

HPE Compute

Accelerate innovation from edge to cloud with workload-optimised compute for today's data-first, hybrid world.

HPE ProLiant Servers

Server technology engineered for your hybrid world and designed to unlock more value from your data, as well as power insights and innovation across edge to cloud.

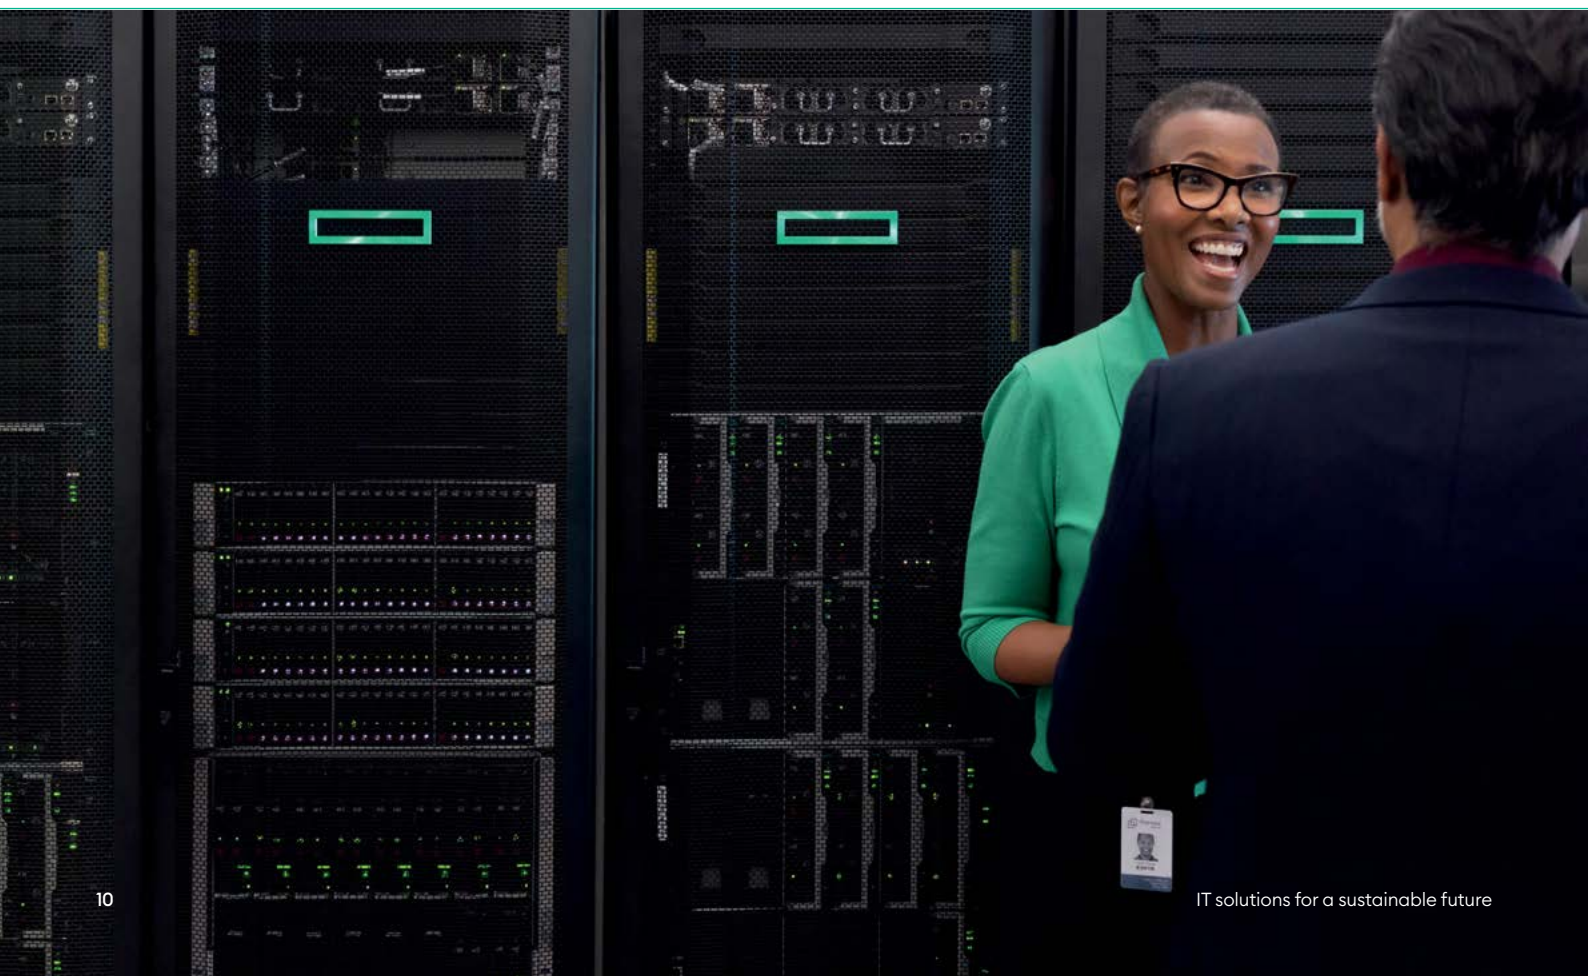

HPE Synergy

Deploy a composable bladed infrastructure that powers any workload within a hybrid cloud environment. HPE OneView simplifies infrastructure life cycle management across compute, storage, and networking.

HPE Edgeline Systems

Converge OT and enterprise-class IT in a single, ruggedised system that implements data centre-level compute and management technology at the edge.

HPE Storage Solutions

Enhance the power and capabilities of your storage solution through cutting-edge HPE technology. With cloud-based management options, lightning-fast performance and flexible pricing, HPE Storage offers a solution for every business type and size.

HPE GreenLake for Block Storage

Deploy and manage resources across your private and public clouds while retaining control of your data, as well as flexibility over how you consume and manage your services. Available in both block and file storage.

HPE Alletra

Offering heightened performance, simplified management, and a unified approach to storage technology, the HPE Alletra range is an ideal choice for any organisation's infrastructure.

HPE Alletra dHCI

HPE Alletra disaggregated HCI (dHCI) delivers a hyperconverged experience that combines business-critical speed and resiliency with independent scaling of compute and storage.

HPE MSA

HPE MSA (Modular Smart Array) offers an enterprise-class SAN solution designed for increased speed, enhanced security, and a growth in capabilities.

Zerto, a HPE Company

Unlock ransomware resilience, disaster recovery, and continuous data protection to radically reduce data loss and downtime.

Cloud Based Management Software

HPE InfoSight

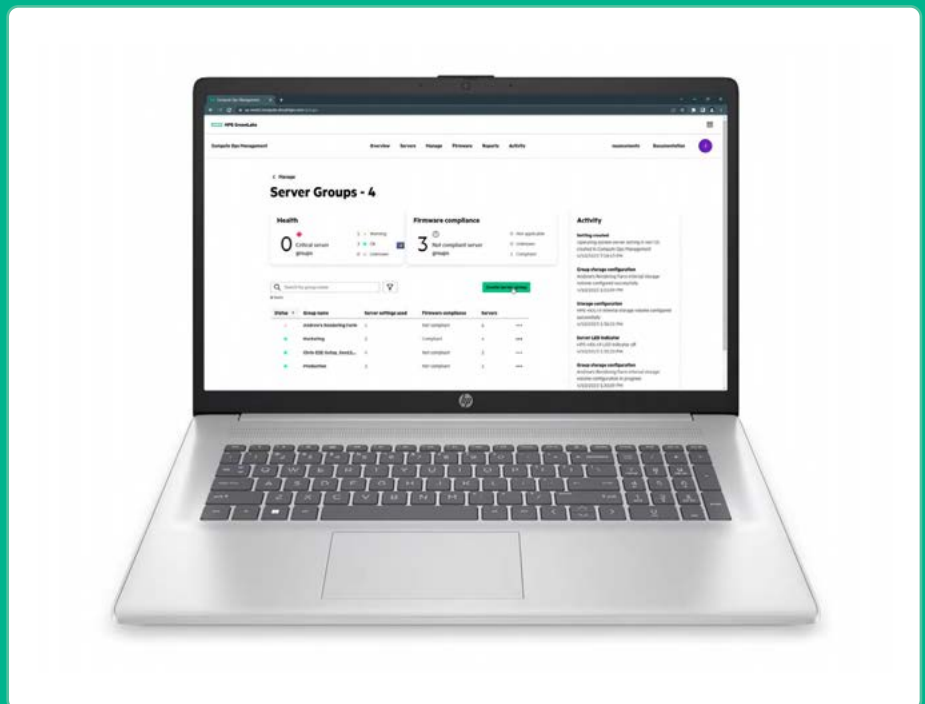

HPE InfoSight uses advanced AI to deliver autonomous operations that ensure your environment is always-on, always-fast, and always-agile.

HPE Ezmeral

Accelerate the life cycle of analytics and AI models with a comprehensive SaaS platform managed ecosystem of open-source tooling, and standardised environments.

HPE Compute Ops Manager

Offering a comprehensive, cloud-native solution for managing compute resources, HPE Compute Manager is designed to optimise your business systems.

As an HPE Silver Partner, and with years of experience under our belts, Techbuyer can help you explore HPE Aruba Networking for a cost-effective, powerful and cloud-native solution.

HPE Aruba Networking Solutions

Enhance the power, performance, and capabilities of your networking infrastructure with cutting-edge technology, cloud-based networking and industry-leading security. HPE Aruba's integrated system ensures exceptional performance and efficiency.

HPE Aruba Networking InstantOn

For small businesses, it is challenging to keep up with new and emerging technology. HPE Aruba Networking InstantOn is purpose-built to support small businesses, offering a reliable solution to keep them agile and competitive.

HPE Aruba Enterprise Networking Solutions

HPE Aruba Networking enterprise-grade switches combine high efficient compute power with robust performance to meet the demands of large organisations. This technology delivers industry leading solutions, creating secure, performance-driven systems that are scalable and flexible.

HPE Aruba Networking Central Access

HPE Aruba Central offers AI-powered insights, unified management, and enhanced security to elevate your networking systems.

Simplified Network Management

Enhanced Visibility and Analytics

Operational Efficiency

Our expert team is highly trained in HPE Aruba Networking technology to deliver bespoke systems and innovative solutions for the development of your infrastructure.

Designed to maximise simplicity, the Fortinet Security Fabric delivers complete protection, everywhere you need it, whilst maintaining a simple environment.

Techbuyer can deliver technical resources and expertise to assist designing and implementing your Fortinet deployment.

Fortinet is a global leader in cybersecurity, delivering a broad, integrated and automated security fabric to enable customers to accelerate their digital journey.

As organisations go through digital acceleration, their attack surface expands, and network complexity increases.

The Fortinet Security Fabric is at the heart of the Fortinet security strategy. The platform is built around a common operating system and management framework which enables broad visibility, seamless integration and interoperability between critical security elements, and granular control and automation.

Protection from Costly Data Breaches

Techbuyer can help protect your organisation from costly data breaches through advising on the right Fortinet solutions for your business, including security assessments, data protection and threat mitigation.

Fortinet Solutions

→ Security-Driven Networking
→ Cloud Security

→ Operational Technology
→ Zero Trust Access

→ Endpoint Security
→ SMB Digital Security

With over a decade of delivering innovation and first-class support, Veeam distinguishes itself as the global leader for backup, recovery and data management solutions that deliver Modern Data Protection.

Protect and Recover Data on Your Terms

Veeam Backup is the perfect backup and recovery solution for Hyper V and Virtual Machines (VM) across a range of brands including HPE, Cisco and Dell. It's easy to use, cost-effective, and provides powerful data protection for your business. Specifically, the software is ideal for bringing multi-server applications back online instantly.

Suitable For A Range Of IT Environments

Veeam Backup meets the demands of organisations of all sizes, enabling them to reduce their recovery time objectives. Veeam is particularly skilled at backing up data from virtual servers.

Veeam Backup for Microsoft 365

With Veeam Backup for Microsoft 365, Techbuyer can help you backup data to any location, on-premises or in cloud object storage, including Amazon S3, Azure Blob, IBM Cloud, or S3 compatible providers.

- Safeguard your Microsoft 365 data from accidental deletions and security risks.
- Quickly restore Microsoft 365 data with top-tier flexibility.
- Meet compliance requirements with rapid search-and-find capabilities.

Veeam Data Platform

Veeam® Data Platform with Veeam Backup & Replication™ v12.1 is a complete solution that delivers Data Security, Data Freedom, and Data Recovery to your entire hybrid environment, including cloud, virtual and physical workloads.

Veeam Ransomware Recovery

Minimise risk and speed up ransomware recovery with zero data loss. Veeam Ransomware Recovery ensures speedy recovery with replicas, snapshots and high-speed repositories.

With our in-depth knowledge of Microsoft and extensive support capabilities, Techbuyer can advise on the right solution for your business and help you to adopt and deploy all Microsoft technologies.

Supporting Your Migration to Microsoft 365

Building an effective migration plan can be challenging, we can help to implement and manage migrations to Office 365 and Microsoft 365. Deliver a comprehensive solution to all your office needs with Microsoft 365 business plans.

Designed to meet all of the needs of the modern business, Microsoft Office 365 provides a range of software services to develop your operations. With scalable plans, based on both monthly and annual subscriptions, Microsoft 365 offers a flexible and widely known platform for your business.

Microsoft Silver Partner

As a Microsoft partner, we can assist in the planning, design, implementation, and management of your Microsoft journey. We have a team of trained in-house engineers and access to the Microsoft Fast-Track engineering team to aid in the migration and ensure the process takes place smoothly.

As a silver partner, Techbuyer offers competitive pricing for all Microsoft solutions, including Office 365. Subscriptions for this pricing can be on an annual, or monthly basis, and can be scaled as your business grows.

Contact our team for a rundown of everything that Microsoft 365 can offer you, and how our expert team can get you set up with the latest software offerings.

Our experience, expertise and well-established relationship with Microsoft means we can keep you up-to-date with new technologies and enable you to uncover business growth opportunities.

As a Silver partner, Techbuyer offers exclusive benefits such as preferred pricing, customised support, and expert technical guidance to optimise every Synology deployment.

Tower Servers

Advanced Data Management

Compact and energy-efficient servers ideal for building a robust private cloud, data protection, or surveillance solution.

Rackmount Servers

General Purpose Storage – High-performance, scalable, and reliable systems for large-scale enterprises tackling specialised applications.

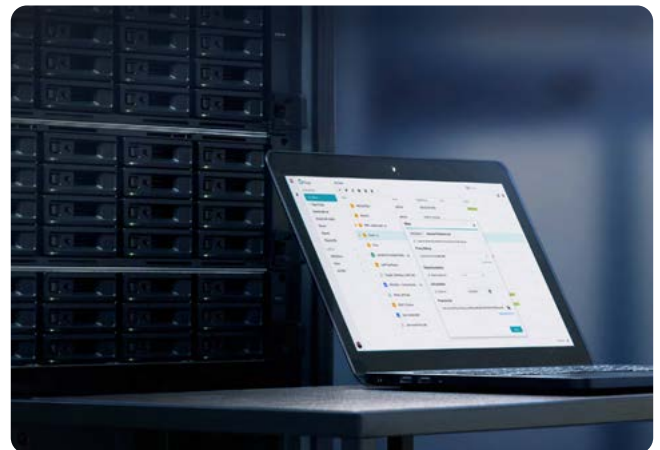

All-flash Arrays – All-flash storage engineered for high-performance workloads, business applications, and virtualisation environments.

High Scalability Solutions – Scalable high-density storage for multi-petabyte applications.

Looking for reliable and scalable data storage and management solutions?

As a Silver Synology partner, Techbuyer can provide reliable, professional-grade network-attached storage and management solutions, that transform data storage and protection. Whether you need to centralise files, secure critical backups, or enable seamless access for remote teams, we provide tailored solutions built to meet your unique requirements.

With Synology's innovative technology, your business gains access to robust data centralisation, secure backups, and flexible on-the-go sharing, ensuring efficiency and security in any environment.

Whether you're a small business, a growing enterprise, or a large organisation, Synology's solutions are designed to adapt to your needs, while advanced security features give you peace of mind when it comes to protecting sensitive information.

Techbuyer's Disk Partnerships

Access competitive prices and availability for some of the biggest names in the storage industry through Techbuyer's disk partnerships. We deliver storage solutions to optimise your data management and drive efficiency.

KIOXIA

Maximise the power and performance of your storage with technology from the innovators of flash memory. KIOXIA offers reliable and performance driven storage drives that bolster your system and reduce bottlenecks.

As part of our disk portfolio, Techbuyer offers a wide range of memory technologies from Samsung, including high-performance, high-reliability data enterprise storage solutions and SSDs.

Micron is a world leader in innovative memory and storage solutions, boasting a broad range of high-performance memory technologies. Techbuyer offers a wide selection of Micron's leading-edge client and enterprise SSDs to complement our disk portfolio.

TOSHIBA

For over 50 years Toshiba has been developing and delivering high-quality hard disk drives to the market.

Techbuyer partners with Toshiba to provide customers with mobile and industrial ranges of HDDs, offering advanced warranty options across the Toshiba range, as well as technical support when required.

Techbuyer partners with Seagate to deliver a wide range of enterprise HDDs.

For over 40 years, Seagate has offered innovative and easily integrated storage solutions built on trust, affordability, and ease.

Techbuyer's Other Vendors

In addition to our main supplier relationships, we also work with the following vendors to provide additional products and services.

Public Sector

As a CCS approved supplier we can provide public sector organisations with high-quality IT solutions designed specifically for your workload, budget and business structure.

Crown Commercial Service *Supplier*

We are approved suppliers for:

- **Lot 2:** Hardware and Associated Services
- **Lot 7:** Sustainability and Circular IT
- **Lot 8:** Catalogue

This means that we can help public sector organisations with every IT decision – procurement, maintenance and disposal.

Techbuyer is a trusted supplier of central government departments, NHS trusts, universities, colleges, local and county councils across the UK.

Access cost-effective new and refurbished IT solutions designed to boost IT capabilities even in times of significantly reduced investment. We also offer competitive prices and trade-in values for used or surplus IT hardware.

Government Digital Sustainability Alliance (GDSA)

Techbuyer is a member of the GDSA, working alongside DEFRA, as well as other businesses in the industry, to inform government on sustainable IT best practice. We can work with your organisation to develop an IT system that improves your environmental impact, without compromising on your priorities.

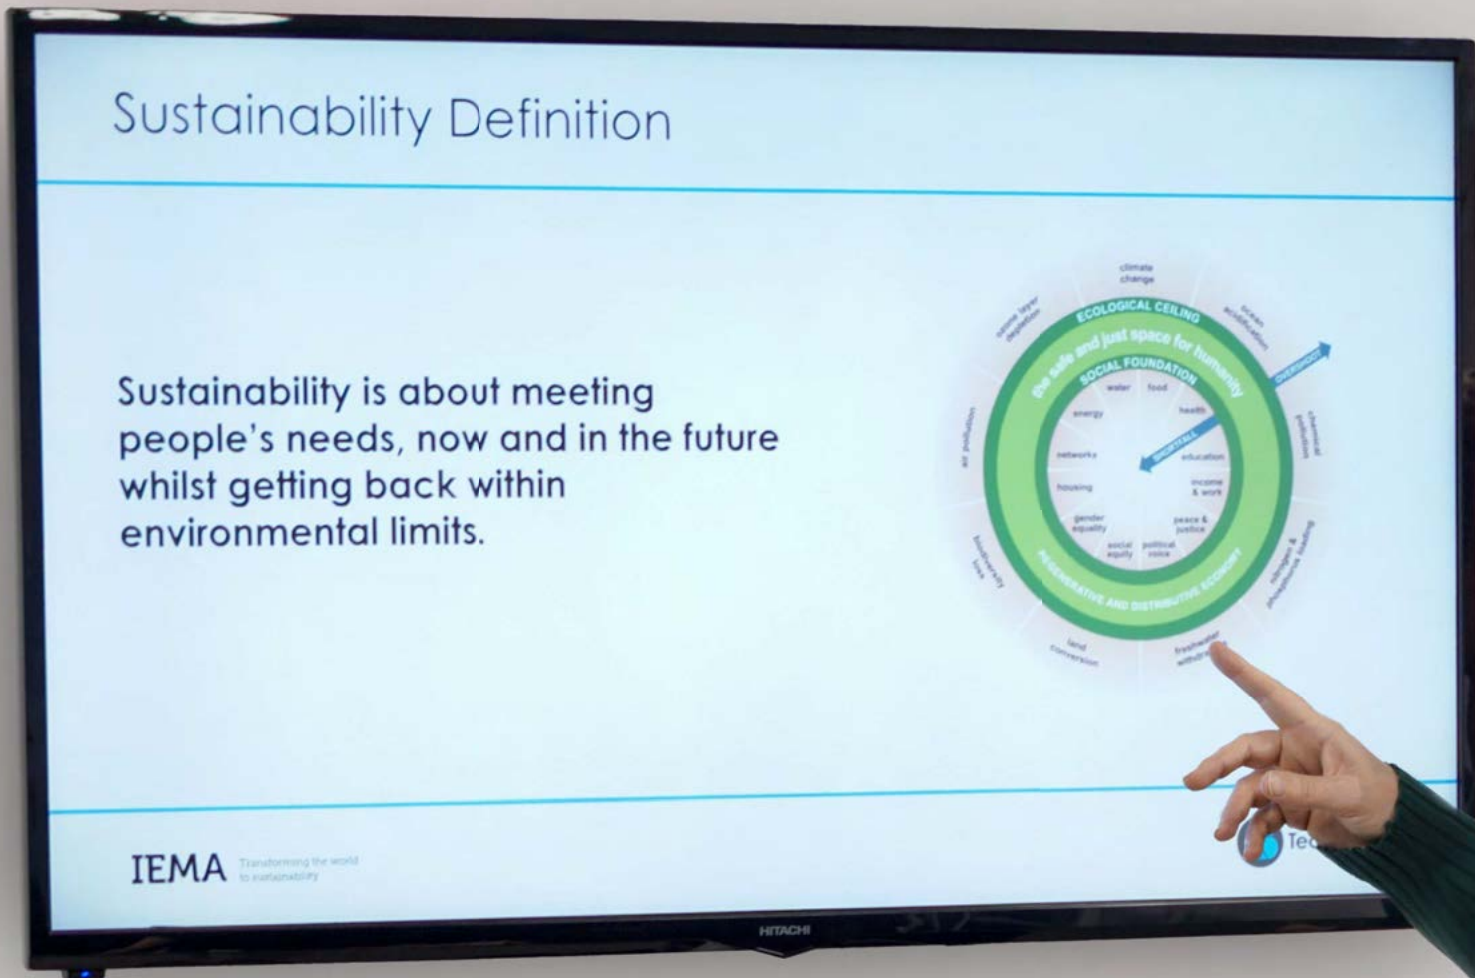

Where Can You Find Techbuyer?

- CCS Technology and Associated Services 2;
- Value Match Portal;
- Health Family Portal; and
- Bluelight.

Contact our team to find out if we're on your public sector procurement framework of choice.

Sustainability

Techbuyer's IT solutions are designed to deliver a complete offering for sustainable IT best practice. This includes providing high-quality refurbished hardware, server estate analysis for optimisation, efficient IT infrastructure design, IT maintenance and product life extension, as well as eventual responsible disposal options for all technology.

Carbon Savings Calculator

Techbuyer's services are supported by our bespoke carbon savings calculator to assist you with reporting on emissions and with demonstrating your sustainability efforts.

UN Global Goals

We have committed to ambitious targets against three of the 17 UN Goals for Sustainable Development. These are 'Good Health and Wellbeing', 'Quality Education' and 'Responsible Consumption and Production'.

Net Zero Pledge

In 2023 we announced our pledge to become a Net Zero organisation, across Scope 1, 2 and 3, by 2050. This includes an interim target of achieving a 42% reduction in our baseline emissions by 2030.

IEMA Training

Advance your understanding of environmental issues and legislation through Techbuyer's IEMA accredited sustainability training sessions. Designed for all businesses and levels of understanding, this training can be tailored to your organisation.

“The course was interactive and welcomed discussion. It was kept engaging and covered a wide range of topics.”

Nick Edwards, Resource Efficiency Manager,
West Yorkshire Combined Authority

We offer the following courses:

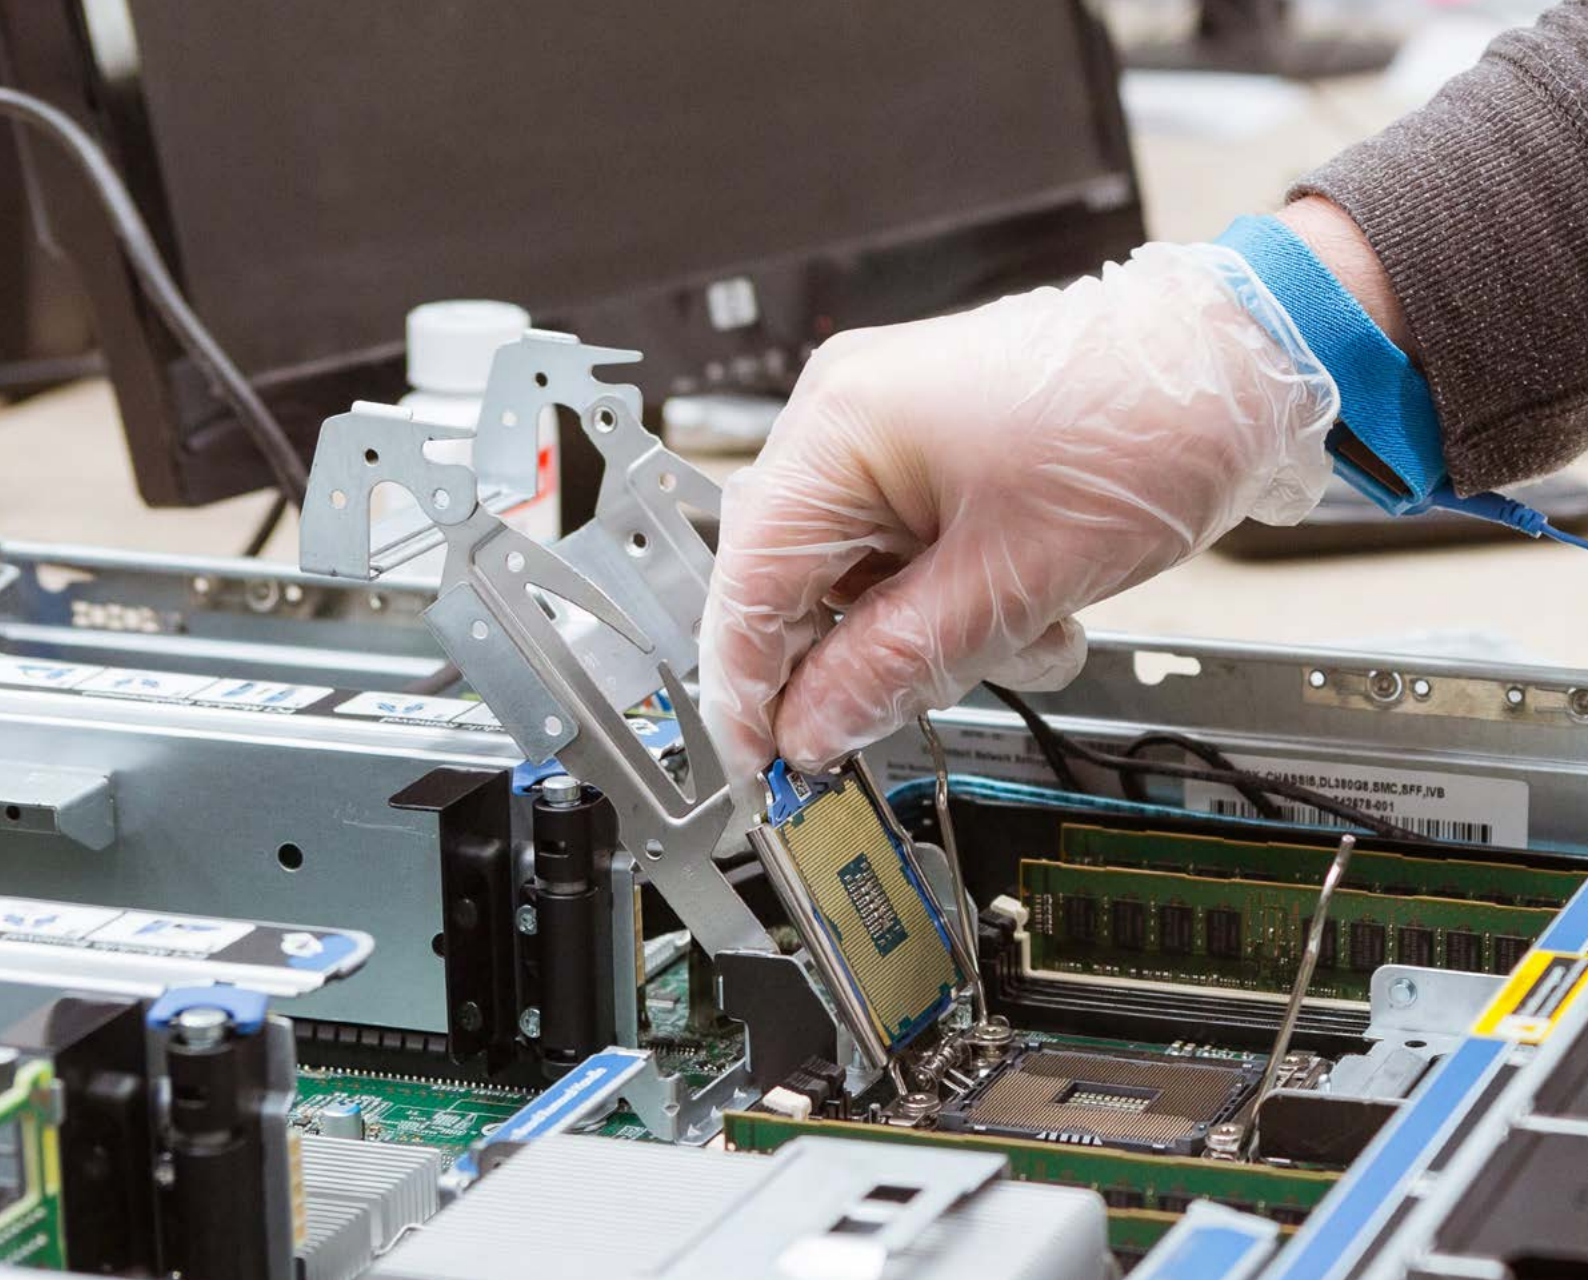

- IEMA Sustainability Skills for the Workforce
- Foundation Certificate in Environmental Management
- Pathways to Net Zero

IEMA Corporate Partner and Training Centre

After winning the IEMA Sustainability Impact Award for Circular Economy back in 2020, we have an extensive history with IEMA and recently became a Corporate Member. Our Head of Sustainability, Astrid Wynne, is a Chartered Environmentalist and provides expertise on all courses offered.

Why Choose IEMA Sustainability Training...

- IEMA-accredited exam and certification
- Delivered by industry experts in sustainability
- Cross-peer learning interactive tuition
- Tailored to be sector specific

Configure to Order Service (CTO)

Techbuyer provides an extensive range of quality, custom-built servers and storage.

Servers Built to Your Specifications

Our expert team are on hand to design and create your ideal server build according to your company's unique needs. This service allows you to design a device that will address your priorities and support your business development.

With over 225,000 parts in stock, your server can truly be built to your exact specifications without compromise.

Specialist IT Advice

We provide a complete 'end-to-end' configuration process. First, one of our CTO specialists will discuss your IT requirements with you. They will then suggest the best server configuration solution for your needs and budget. We generate a quote within just one hour.

Our CTO technicians then build the server for you, free of charge. We conduct a comprehensive 25-point quality control process and provide a three year warranty for complete peace of mind.

A Server to Suit Your Needs

Our CTO service comes with several configurable options including CPUs, PSUs, memory, RAID cards, hard drives, adapter cards and racking options. We can build CTO servers with brand new parts, quality refurbished parts or with a combination of the two.

We also provide numerous CTO storage options, including fully populated storage arrays. The RAID is preconfigured for easy installation.

Throughout 2023/24 the refurbished hardware we sold contributed towards a carbon saving of over 31 million kg of CO₂e when compared to the sale of new equipment.

Certified Refurbished Servers

Techbuyer certified refurbished servers guarantee the same performance and reliability as new.

Global Stock and Fast Shipping

Techbuyer certified refurbished servers guarantee the same performance and reliability as new. We stock over 150 brands including HPE, Dell and IBM, and turn around server orders quickly.

The Same Performance As New

When you choose refurbished with Techbuyer, you avoid expensive price tags. This doesn't mean compromising on quality. Our vendor certified technicians clean and test every refurbished device. We use a 25-point recertification process and include a three year warranty for peace of mind.

The Sustainable Choice

Techbuyer's mission is to extend the life cycle of IT hardware. By refurbishing, upgrading and repairing servers, we keep quality technology in use. We provide unrivalled customer service for our clients across the globe.

Certified Quality with 3-Year Warranty

All refurbished equipment we sell undergoes a comprehensive 25-point recertification process, including repairs, where necessary, undertaken by our highly-qualified team. All refurbished devices and components supplied by Techbuyer include a three year warranty for full peace of mind.

IT Maintenance Services

We deliver solutions to help you keep your IT hardware in use for longer, saving you time, money and effort on your IT maintenance.

IT Repairs

Repairing existing IT hardware maximises your budget and guarantees performance as good as new. Once we have repaired your equipment, we test every component and provide full documentation. This service could potentially add years onto the lifespan of your hardware.

Our IT technicians have decades of experience in processing and restoring IT hardware. We repair a variety of equipment including HPE, Dell and IBM servers, motherboards, server memory, CPUs, GPUs, workstations, tablets, desktops, plus laptops and their components. Software support and firmware updates are also available for data centre equipment.

Laptop and Desktop Upgrades

Looking to enhance the performance of your existing laptops and desktops? Our Upgrade Service is the most cost-effective and sustainable solution. Our approach improves performance and maximises your IT budget whilst preventing technology from going to waste.

Upgrading your devices enables up to an 80% cost saving. This frees up your IT budget for other projects whilst keeping quality technology in use. We turn around large orders in under 24 hours, refurbish or ethically recycle all used components, and provide industry-leading data security.

IT Maintenance and Support

Maximise uptime with 24/7/365 IT maintenance and support, available on both new and refurbished hardware.

IT Maintenance and Support Services

Our support service includes 24/7 IT repair and maintenance, remote access support and managed IT services, as well as installation and integration support. This is available for an extensive range of data systems including HPE, Dell, IBM and Cisco.

Needing a One-off Repair or Health Check Service?

We can organise an adhoc engineer service without a support contract if and when necessary. Get your IT equipment repaired or checked by an expert engineer when disaster strikes, or run a vital health check to ensure that everything is working as it should.

Choose the Level of Cover That Suits You

All supported IT hardware receives access to remote diagnosis and technical support, hardware replacement and repair, plus an on-site engineer where required.

We have two standard service options which can be fully customised:

- **24/7/365** – including an on-site engineer within 4 hours and parts replacement.
- **9-5** next business day on-site engineer and part replacement

Contract lengths can be tailored to suit your operational and budgetary requirements.

Buyback and Data Centre Services

Meet your security needs and sustainability goals whilst maximising your IT budget through Techbuyer's Buyback and Data Centre Services. We provide a range of solutions to remove your redundant IT hardware without compromising on value, security, or environmental impact.

Sell to Us

At Techbuyer, we understand that used IT equipment has value. Our global team provides competitive prices for your excess and used servers, storage and networking equipment, laptops and desktops.

Our approach is simple. We provide a quote within 24 hours, then collect, data sanitise and refurbish your IT equipment.

IT Asset Disposition (ITAD)

For our highest level of data protection, as well as flexible contracts on IT hardware collection and security, customers can make use of our ITAD services.

IT Asset Disposition (ITAD) provides the most secure and sustainable way to dispose of redundant IT hardware.

Decommissioning Services

Streamline the entire decommissioning process with Techbuyer's Data Centre Services. With personalised advice from our IT specialists, we handle the entire process, from auditing right through to replacing hardware.

We have a flexible approach and always provide industry expertise to create a solution that meets your specific requirements.

Secure and Compliant Data Erasure

Techbuyer's data erasure service is the most secure way to sanitise your data bearing devices. We make data completely unrecoverable with White Canyon and Blancco's industry-leading software. This is the same software used by the US Department of Defense and NASA, and is fully compliant with GDPR.

Techbuyer guarantees the highest level of data security, and our global team is always working to stay ahead of the latest security regulations. Our data erasure software is fully compliant with requirements set by government agencies, legal authorities and independent testing laboratories across the world. This includes backing from the National Cyber Security Centre's Commercial Product Assurance (CPA).

Data Bearing IT Destruction

Whilst our secure data erasure service destroys 100% of data, there are circumstances in which businesses also need a form of disposal which physically destroys their devices. Techbuyer's data destruction service is a secure solution for used, data bearing devices including HDDs and SSDs.

RESOURCE RECOVERY

Resource Recovery | E-waste Recycling

Techbuyer provides sustainability focused e-recycling services alongside our refurbishment process to reduce the impact of e-waste on our global environment and offer competitive pricing for your used technology.

Why Resource Recovery?

Remove redundant equipment of all kinds and divert your e-waste from landfill for a more sustainable option.

Leading E-waste Recycling Services:

- All IT items and associated equipment removed
- Collection available
- Effective e-waste management

We hold a zero-to-landfill guarantee on all devices and components we receive to ensure that no technology ends up where it shouldn't and that we help fuel the circular IT economy.

What Electronics Can I Recycle Through Techbuyer?

- Servers / Server Components
- Networking Equipment
- Laptops/Desktops / Mobile Devices
- HDDs and SSDs
- Cables and Peripherals
- PC Components and Spares

From single devices to entire data centres, we work with you to reduce the impact of e-waste on the environment.

Global Delivery

We regularly ship to over 100 countries worldwide, and work with all major couriers, with the vast majority of orders being shipped same day.

- Global stock locations
- Extended cut off times allowing for any last minute orders
- Bespoke designed protective packaging to ensure your goods arrive in pristine condition
- Cost-effective and reliable pallet network available
- Next day delivery to UK and Europe, same day delivery available

“Our global stock locations, ISO accreditations and team of over 200 IT specialists make Techbuyer the go-to provider for sustainable IT solutions.”

Steve Sexton, CEO
